Net als vermeld in het bovengenoemde boek "Straling van alle kanten bekeken adviseer ik (citaat van pag. 20 van dat boek) :

1. Pauzeren & onderzoeken – pauzeer de verdere implementatie van 5G voor het doen van grondig wetenschappelijk onderzoek om de controverse te overbruggen en om de bevolking correct te informeren.

2. Kennis & dialoog – voer een open maatschappelijke dialoog over de invloed van 5G- straling op mensen, dieren, planten, water en bodem op basis van actuele en onafhankelijke kennis. Dit ook om polarisatie op grond van belangen te voorkomen en om de bevolking vooraf correct te informeren.

3. Fondsen & keuzen – stel ruimhartig fondsen beschikbaar voor onafhankelijk onderzoek naar niet-thermische effecten van kunstmatige EMV op de mens en het ecosysteem. Laat partijen hun keuzes helder maken voor het onderzoek dat zij nu dringend nodig vinden. Vele thema's dienen zich aan: testen van de recente hypotheses, onderzoek naar de gezonde en schadelijke frequenties in biologisch materiaal, naar de impact van EMV op water, naar oplossingen voor de groeiende groep elektrosensitieven, naar EMV en de hersenen, naar EMV en het ecosysteem, naar de invloed op klimaatbeleid etc.

4. Visie – schets een heldere en goed geïnformeerde toekomstvisie op een veilige aanpak van draadloze communicatietechnieken ten bate en niet ten koste van mensen, dieren en planten en van milieu en ecosysteem. Daar zijn niet alleen de kiezers bij gebaat, maar ook de industrie, de wetenschap en de politiek zelf. Niemand is erbij gebaat als de keuzes van vandaag een broedplaats worden voor een gezondheidscrisis van morgen.

Bronnen bij fysieke klachten door blootstelling aan EMV
Fysieke impact van blootstelling aan niet-ioniserende niet ioniserende straling beneden de WHO/ICNIRP normen :

Blootstelling aan EMV's veroorzaken wellicht allerlei fysieke klachten zoals; autisme, aantasting van het immuunsysteem, auto-immuun ziekten, kanker, leukemie, hartafwijkingen, alzheimer, tinnitus, astma, etc.
