

Hello, my child was placed out of the home in 2021 in The Hague, due to the defamation of a third person. The defamations are provable. Jeugdbescherming West and Jeugdformaat as well as Dutch police, have then, upon the request of this person who wanted to harm me, taken my then 11 year old son and placed him with a dubious foster father in Voorburg. Upon request of that person I was thrown out of my apartment, my apartment was searched and lies were spread to the RvdK to justify the measure. My personal belongings were sold by a social worker from Jeugdformaat upon request of the perpetrator. That social worker then placed herself as part time foster mother to my son - that would be completely illegal in my country Austria as well as in Germany. I was then forcefully put into a mental hospital, where no mental illness could be diagnosed. When I left six weeks later, I had no child, no home and I had to rebuild everything I ever had. After four months I had a new apartment and was financially stable again. The RvdK and court ignored it and kept claiming that I could not take care of my child. My son was told that he was adopted by the foster father and that I was mentally ill and don't want him. The contact between my son and his family was completely cut off after one year. I recently heard that my son got into physical fights with the foster father and that my son has threatened to harm himself with a knife. Police had to intervene several times at the foster father's home. My son is clearly not safe there. He is a child, who was raised well cared for and went to a private school - we lived at Nordeinde, by the King's palace at the time he was taken - and now he has to remain in this corrupted, drug and crime infested country with a low level of everything from education to health care, low life quality standards and low morality. I am about to make this public, in order to raise attention outside of the Netherlands.
