

This amendment will bring down the morale of the existing HSM who chose to live in Netherlands with willingness to work and contribute to the economy. The 30% ruling system for HSM visa holders works in two ways 1) country wins the talent migrant out of all the foreign opportunities what he had. 2) The talent chooses the country and starts to buy assets in Netherlands under the impression that He/She will get the citizenship after exhausting the ruling.

What happens if the citizenship period gets extended from 5 to 10.

1) The HSM will not choose Netherlands in the first place which will impact the a growing international company who cannot support the requirement with the available resources within the country  
2) The HSM visa holders will not invest in anything inside Netherlands(House, Car, appliances, etc) as he/she will be in constant dilemma if he wants to stay or go back after the ruling is exhausted. 2)  
He/She will prefer international school instead of a Dutch school. 3)money saved will be invested in a foreign country.From my perspective it will be wise to implement this rule for all the future migrants who can choose if it fancies him/her to live in Netherlands or not, but please do not do this to the existing HSM visa holders.
